DETAILED ACTION

Claim Objections

1. Claims 1, 9, 13 and 15 are objected to because of the following informalities:
2. Claim 1 line 2 replace -- the -- with "an" before inner one.
3. Claim 1 line 3 replace -- the -- with "an" before outer axis.
4. Claim 1 line 3 replace -- the -- with "a" before phase difference.
5. Claim 1 line 3 replace -- of -- with "between" after difference and before axes.
6. Claim 9 line 2 replace -- the -- with "an" before inner axis.
7. Claim 9 line 2 replace -- the -- with "an" before outer axis.
8. Claim 13 line 12 replace -- the -- with "an" before outer axis.
9. Claim 13 line 13 replace -- the -- with "an" before inner axis.
10. Claim 15 line 3 replace -- the -- with "an" before inner axis.
11. Claim 15 line 3 replace -- the -- with "an" before outer axis.
12. Appropriate correction is required.

Claim Rejections - 35 USC § 112

13. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

14. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

. Claim 1 recites "the inner one of the axis is inside the outer axis". This recitation is not clearly understood since as depicted in FIG 4A and FIG 4B, elements (100) and (102) are coaxial and share the same common axis. Also, the reference to "inner axis" and "outer axis" as set forth in line 8 of claim 1 is not clear since only one common axis is disclosed in the drawings. Please note that an axis is defined as a line about which a body turns. Independent claims 9, 13 and 15 contain similar recitations regarding inner and outer axis and is rejected for the reasons stated above.

15.
